Vitamins for muscle building - these are the 5 most important.

1. Vitamin B1

Also called "thiamine" vitamin is an energy and nerve vitamin.

It is important for the energy metabolism of muscles and nerves. Physical exertion reduces the concentration of vitamin B1 in the blood. The consequences can be fatigue and lack of concentration. In case of severe deficiency, even edema, muscle weakness and nerve inflammation can occur. Foods that contain a lot of vitamin B1 are especially whole grains, tuna, potatoes or pork. The recommended daily intake for adults is 1.3 mg for men and 1.0 mg for women. However, especially people who drink a lot of coffee or green tea and eat little whole grains, should pay attention to an increased intake of vitamin B1!

2. Vitamin B6

This B vitamin is the "muscle-building vitamin" par excellence! It is also called "pyridoxine". B6 is the key vitamin in protein metabolism, therefore the need for protein consumption increases as well. In addition, it can prevent arteriosclerosis.

Although deficiency symptoms are usually rare, the deficiency manifests itself with reduced protein synthesis, muscle wasting and muscle cramps. The recommended daily allowance for adults is 1.5 mg for men and 1.2 mg for women for vitamin B6.

In the diet, Vitamin B6 is increasingly found in chicken, potatoes, beans, lentils, avocado or oily fish.

3. Vitamin B12

The special thing about this vitamin is that it is produced exclusively by microorganisms. Vitamin B12 contributes to the development of endogenous proteins. Therefore, a sufficient supply is especially important for athletes!

The recommended daily intake for adults is 3 µg for men and women. The body can not produce vitamin B12 itself. Vitamin B12 is found mainly in animal products such as meat, fish, eggs and dairy products. Especially vegans or people with chronic gastrointestinal diseases or a lack of intrinsic factor can develop a vitamin B12 deficiency in the long run.

4. Vitamin E

Vitamin E (tocopherol) is the only fat-soluble vitamin in our top 5 and is therefore absorbed via dietary fat. Also tocopherols is attributed a pronounced antioxidant effect.

Thus, the cells of our body are threatened to the DNA of aggressive oxygen compounds, which are also called free radicals. Vitamin E now plays the role of a "scavenger".

Also, vitamin E is involved in the metabolism of carbohydrates, proteins and nucleic acids and thus also responsible for the healthy development of our muscles.

The recommended daily intake for adults is 14 mg for men and 12 mg for women.

Foods for a good source of vitamin E are mainly vegetable oils! In small amounts, eggs, nuts and butter contain vitamin E.

5. Vitamin C

Vitamin C is also commonly referred to as ascorbic acid. The most well known effect of vitamin C is the strengthening of the immune system. A deficiency makes you more susceptible to infections, in extreme cases even scurvy. Vitamin C after a hard workout not only strengthens the immune system, but also helps in the regeneration of cartilage, tendons, ligaments and bones. The German Society for Nutrition (DGE) recommends a daily requirement for adults of 100 mg vitamin C for men and women. However,

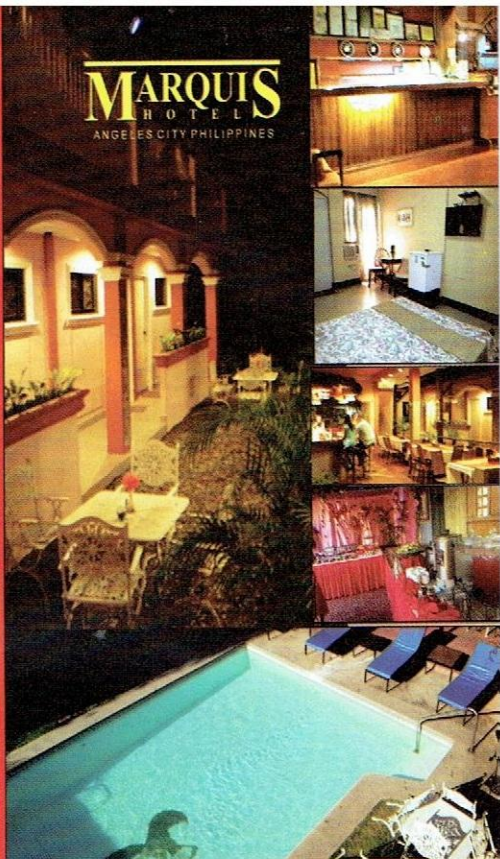

I recommend anyone who regularly sports makes a much higher dosage of vitamin C. 500 to 1000 mg of vitamin C per day is the usual dosage for athletic active people! Real vitamin C bombs are citrus, but also berries, or vegetables like peppers or potatoes contain vitamin C.

Here are a few Jokes to laugh

1. Boy complains to his father: You told me to put a potato in my swimming trunks! You said it would impress the girls at the pool! But you forgot to mention one thing!
Father: Really, what? Boy: That the potato should go in the front.

2. It is evening. Little Johnny and his friend are sitting by a camp fire. They've been plagued by swarms of mosquitoes already for an hour and the assault only worsens when the darkness sets in. Suddenly, fireflies appear. Little Johnny swears: "These darn mosquitoes! Now they've even brought lanterns with them to find us!"

3. What is black – white – black – white – black – white?

A penguin rolling down a mountain!

What would you get if you crossed a vampire with a dwarf?

A creature that sucks blood from your knees.

"Sir, you cannot fish here!"

"Don't worry, I'm not fishing, I'm just teaching my worm to swim."

4. Daddy, why is the sky so high?

So the birds wouldn't hit their heads all the time, darling.

Why do dolphins swim in salt water?

Because pepper water would make them sneeze.

A little boy visits his farmer grandpa and watches him milk the cows.

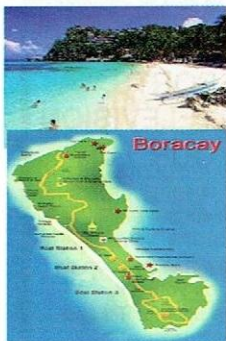

The next day one of the cows runs away and grandpa is really upset about it. "Don't worry, Grandpa," says the boy helpfully, "she can't have gone very far with an empty tank."

What happens when a cop gets into bed?

He becomes an undercover cop.

Nice trips in the Philippines

Boracay

Boracay is a small island in the central Philippines. It's known for its resorts and beaches. Along the west coast, White Beach is backed by palm trees, bars and restaurants. On the east coast, strong winds make Bulabog Beach a hub for water sports. Nearby, the observation deck on Mount Luho offers panoramic views over the island. Offshore, coral reefs and shipwrecks are home to diverse marine life.

Area: 10.32 km² Elevation: 100 m Province: Aklan

Mactan Lapu Lapu

Mactan is a densely populated island located a few kilometres from Cebu Island in the Philippines. The island is part of Cebu Province and it is divided into Lapu-Lapu City and the municipality of Cordova.

Area: 65 km² Elevation: 6 m

Did you know: Of the three biggest islands, Mactan and Bantayan are relatively flat while Camotes is hilly

Horoscope Aries (21.03. - 20.04.)

Character of Aries Ascendant

The Aries Ascendant makes a bold and strong impression on his fellow men.

He himself withstands great resistance and gets what he wants. Through his intransigence he can come across domineering and bossy. He does not let others say anything, he prefers to set the tone. With his self-confident demeanor and humorous style, the dynamic Aries Ascendant brings his fellow human beings quickly on board. His natural authority makes him a born leader. The fiery Martian energy makes the Aries

Ascendant extremely passionate. Whatever he does, he does it with passion.

He also tends to impulsive decisions that turn out in retrospect not always as clever.

Strengths of Aries Ascendant self-confidence, confidence, humor, fervor, courage.

Weakenings of the Aries Ascendant: recklessness, egoism, domination, stubbornness.

Love & Partnership

Right at the beginning of the year, Mars in its own sign and Venus in the intense scorpion between you and your sweetheart. They argue, reconcile, argue ... In March, the balance of relations smoothes, it is really harmonious between April 20 and May 15, when goddess of love Venus stands in your own sign. You feel strongly drawn

back to your partner, you spend the time together intensively - and the sex is just great.

By the way: Aries Singles may look forward to a particularly attractive charisma and great flirting opportunities in this phase. Love can hardly be more beautiful than in midsummer:

From July 28th to August 18th, Mars will make your heart beat faster. Singles make an acquaintance that gets deep under the skin. Is that your dream partner, who turns your head? It could be possible! Couples are in perfect harmony, eagerly forging plans for the future together. At the beginning of autumn, the passion cools, but in November, the harmony returns and will remain until the end of the year.

Occupation & Finance

Thanks to Jupiter you start the new year full of energy and zest for action. They face up to any challenge, find creative solutions to problems and make a difference. Should you be flirting with a professional reorientation, you can rely on Uranus assistance by the end of February.

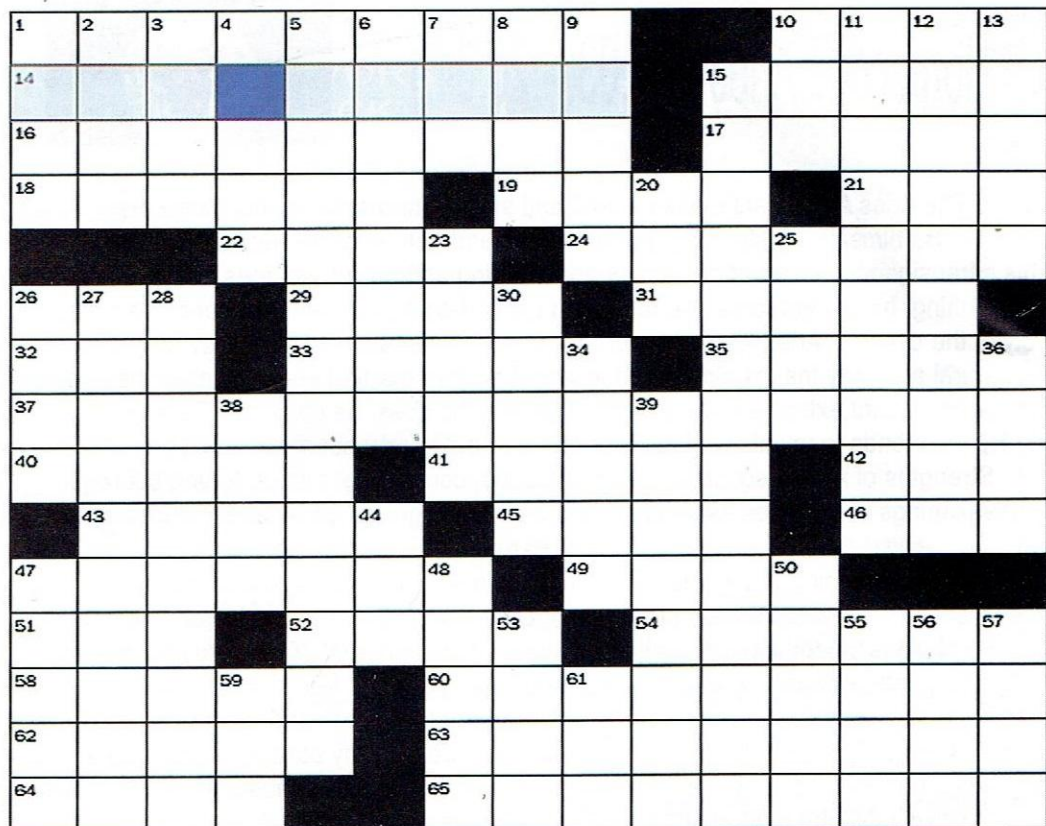

From March 5 to April 16, a lot is going on differently than expected, which throws you off the track for a short time - but as early as April 17, thanks to Merkur you are back in the saddle.

In the usual ram-style you work your way into the right place, wuppen every project, come along with spontaneous changes in the plan very well. When it comes to good money, you should take no risks. Especially from April to October, when Saturn and Pluto are declining, caution is advised. Move larger purchases. Then your financial situation stabilizes

towards the end of the year.

Health & Fitness

The year starts well: Mars, your ruler planet, is in your sign and provides you with proper strength and endurance. Exactly the right thing to restart in 2019 and put good intentions into action. Until July, you are invited to have fun, to try new sports, to tackle new projects, to experience adventures - your physical condition will make you loose. Between August 18th and October 3rd you will have a stressful time ahead of you. It means eyes closed and through. As of November, you will again have plenty of Mars power, but you should not be too busy. Autogenic training, yoga and meditation accompany you through the hectic pre-Christmas time and provide deep relaxation.
